

New from Amsino Respiratory Therapy Systems: Sterile Water for Inhalation in a bottle

AMSure® Hanging Spikeable Bottle

An Alternative Solution to Bag Water

The issue: Bags of Sterile Water for Inhalation can be easily confused with IV solutions, especially a 1 liter bag of 0.9% sodium chloride Injection.

- Inadvertent deliveries of sterile water bags to patient care areas or supply closets can lead to dangerous situations that can cause patient harm

Let Amsino help solve the problem of look-alike solution “bags” and prevent mishaps from occurring by using the AMSure® Hanging Spikeable Bottle.

What’s new about the AMSure® Hanging Spikeable Bottle

- Rigid, plastic material that’s easy to squeeze for priming
- For convenience, the hangar is located on the bottom of the bottle
- Inverted label—assures proper orientation for reading when bottle is in use

Fluid Container Comparison

	AMSure® Hanging Spikeable Bottle	0.9 Sodium Chloride for IV Delivery
Fill Volume	1 Liter	1 Liter
Container Material	HDPE	PVC
Product Shape	Squared Edges	Tube Design
Product “Feel”	Hard/Rigid	Soft/Pliable
